WORK EXPERIENCE

Senior System Engineer (Infosys Limited, Mysore)

April 2022-Present

- Developed a Live Q&A platform supporting **10K+ users**, boosting real-time engagement by 90%.
- Built an **GenAI chatbot** using Langchain & Ollama LLM, achieving **95%** response accuracy.
- Integrated PostgreSQL with **Redis caching** to optimize backend response times under high load.
- Designed and deployed CI/CD pipelines using **GitHub Actions** and Docker, reducing release cycles **by 50%**.
- Managed codebase using GitHub and implemented **automated testing** via GitHub Actions.
- Managed Agile sprints, JIRA tracking, and PR-based **code reviews** with GitHub.

System Administrator (Diya Systems Pvt Ltd, Mysore)

December 2021-April 2022

- Provided **web advisory services**, resolved DNS issues, and optimized system performance.
- Configured and troubleshoot **Linux systems**, ensuring stability and security.
- Enhanced client solutions through strong **communication** and collaboration.

PROJECTS

Meridian-Events (Angular, Node.js, PostgreSQL, GitHub Actions, Redis, NgRx, RxJS)

- An end-to-end **event management platform** allowing users to create, view, and participate in live events.
- Optimized Angular performance with **ChangeDetection & lazy-loading**, reducing initial load time by 70%.
- Implemented **NgRx & RxJS** for state management, improving UI responsiveness.
- Enhanced backend performance using **Redis caching & asynchronous API calls** to handle high traffic.

Task Manager DevOps ([link](#)) (React, Node.js, MongoDB, GitHub Actions, Docker, Terraform)

- Developed a **CRUD** full-stack app for task management.
- Automated CI/CD pipelines using **GitHub Actions**, enabling seamless build, test, and deployment.
- Containerized with **Docker & Kubernetes**, ensuring scalability & service discovery.
- Implemented **role-based access** control for secure access.
- Integrated **Prometheus & Grafana** for real-time monitoring and alerting.

AI-Powered Threat Detection ([link](#)) (Python, React, MongoDB, TensorFlow, Kubernetes)

- Built a cybersecurity system detecting threats & anomalies using **Isolation Forest** and deep learning models.
- Developed a real-time network traffic analysis system using **WebSocket & machine learning**.
- Designed a **real-time dashboard** to monitor threats & security trends.
- Displayed the **threat scores** on a dashboard so users could easily see and check suspicious activity.
